What kind of class is ap human geography

AP Human Geography is a full year course that students would take instead of 9th Grade Social Studies.AP Human Geography is equivalent to a college introductory college level course in human geography.Students should look at the College Board website to view sample questions, syllabus and the test format. purpose of the AP course in Human Geography is to introduce students to the systematic study of patterns and processes that have shaped human understanding, use, and alteration of Earth's surface. Students employ spatial concepts and landscape analysis to examine human social organization and its environmental consequences. They also learn about the methods and tools geographers use in their science and practice.The topics studied in AP Human Geography reflect the following five college-level goals that build on the National Geography Standards developed in 1994 and revised in 2012. On successful completion of the course, the student should be able to:Interpret maps and analyze geospatial data.Understand and explain the implications of associations and networks among phenomena in places.Recognize and interpret the relationships among patterns and processes at different scales. Define regions and evaluate the regionalization process. Characterize and analyze changing interconnections among places.The course prepares students to take the Advanced Placement exam, which students are expected to take at the conclusion of the course.The exam is approximately two hours and 15 minutes long and has two parts — multiple choice and free response. Each section is worth 50% of the final exam grade.Section I: Multiple Choice — 75 Questions; 1 hourThe multiple choice section tests your ability to use and think about maps and spatial data, your understanding of how the world looks from a spatial perspective, your ability to interpret patterns and processes at different scales, your understanding of regions, and finally, your ability to characterize and analyze changing interconnections among places.The portion of multiple choice questions covering each course topic area is:Geography: Its Nature and Perspectives (5%–10%)Population (13%–14%)Cultural Patterns and Processes (13%–17%)Political Organization of Space (13%–17%)Agricultural and Rural Land Use (13%–17%)Industrialization and Economic Development (13%–17%)Cities and Urban Land Use (13%–17%)Total scores on the multiple-choice section are based on the number of questions answered correctly. Points are not deducted for incorrect answers and no points are awarded for unanswered questions.Section II: Free Response — 3 Questions; 1 hour and 15 minutesThis section requires you to interrelate different topical areas and to analyze and evaluate geographical concepts. Some questions may be based on stimulus material such as verbal description, maps, graphs, photographs, and diagrams. You are expected to demonstrate both analytical and organizational skills in your essays. Remember to answer each question in the way it is structured as points are allocated for sub-parts of the question and not for the overall answer.A summer assignment will be posted on the Westhill Website before the end of the school year. To see a sample summer assignment, please visit the following website: exam questions and scoring guidelines can be found on the following website:collegeboard.com/student/testing/ap/humangeo/samp.html/humangeoThe course textbook is The Cultural Landscape: An Introduction to Human Geography by James M. RubensteinIt is recommended that students and their parents review the above information before registering for AP Human Geography. Important Updates AP Daily and AP Classroom Short, searchable AP Daily videos can be assigned alongside topic questions to help you cover all course content, skills, and task models, and check student understanding. Unlock progress checks so students can demonstrate their knowledge and skills unit by unit and use My Reports to highlight progress and additional areas for support. Sign In to AP Classroom AP Human Geography is an introductory college-level human geography course. Students cultivate their understanding of human geography through data and geographic analyses as they explore topics like patterns and spatial organization, human impacts and interactions with their environment, and spatial processes and societal changes. Based on the Understanding by Design® (Wiggins and McTighe) model, this course framework provides a clear and detailed description of the course requirements necessary for student success. The framework specifies what students must know, understand, and be able to do, with a focus on big ideas that encompass core principles, theories, and processes of the discipline. The framework also encourages instruction that prepares students for advanced geography coursework and active global citizenship. The AP Human Geography framework is organized into seven commonly taught units of study that provide one possible sequence for the course. As always, you have the flexibility to organize the course content as you like. Unit 1: Thinking Geographically 8%–10% Unit 2: Population and Migration Patterns and Processes 12%–17% Unit 3: Cultural Patterns and Processes 12%–17% Unit 4: Political Patterns and Processes 12%–17% Unit 5: Agriculture and Rural Land-Use Patterns and Processes 12%–17% Unit 6: Cities and Urban Land-Use Patterns and Processes 12%–17% Unit 7: Industrial and Economic Development Patterns and Processes 12%–17% The AP Human Geography framework included in the CED outlines distinct skills that students should practice throughout the year—skills that will help them learn to think and act like geographers. 1. Concepts and Processes Analyze geographic theories, approaches, concepts, processes, or models in theoretical and applied contexts 25%–36% 23%–29% 2. Spatial Relationships Analyze geographic patterns, relationships, and outcomes in applied contexts 16%–25% 33%–43% 3. Data Analysis Analyze and interpret quantitative geographic data represented in maps, tables, charts, graphs, satellite images, and infographics 13%–20% 10%–19% 4. Source Analysis Analyze and interpret qualitative geographic information represented in maps, images (e.g., satellite, photographs, cartoons), and landscapes 13%–20% 10%–19% 5. Scale Analysis Analyze geographic theories, approaches, concepts, processes, and models across geographic scales to explain spatial relationships 13%–20% 10%–14% AP and Higher Education Higher education professionals play a key role developing AP courses and exams, setting credit and placement policies, and scoring student work. The AP Higher Education site features information on recruitment and admission, advising and placement, and more. This chart shows recommended scores for granting credit, and how much credit should be awarded, for each AP course. Your students can look up credit and placement policies for colleges and universities on the AP Credit Policy Search. Meet the Development Committee for AP Human Geography. When compared to a regular human geography course, the AP® Human Geography course is definitely more difficult. This is because AP® courses are designed to teach students at a college level, so the exams are designed to test a higher level of content synthesis and critical thinking. When you compare AP® Human Geography to other AP® courses, it is one of the most difficult to pass, for reasons outlined in this section. For the 2021 AP® exam season, about half (52.5%) of the students who took the AP® Human Geography exam passed with a 3 or better. The mean score for this exam was 2.69. AP® Human Geography exam is more difficult to pass than the average AP® exam. The statistics included above are based on the number of students who take the AP® Human Geography exam each year. This exam averages approximately 220,000 test-takers each year, which is in the average range for the AP® exam offerings. In 2021, there were a total of 211,735 AP® Human Geography test takers. To make the best use of your study time for the AP® Human Geography exam, it is important to understand how the units covered in the course content are weighted on the actual exam. Knowing the weighting of each unit will allow you to focus your attention on the areas that carry a higher weight. The AP® Human Geography exam covers seven total units. Units 2-7 all carry the same weight at 12-17% of the exam. The first unit, Thinking Geographically, carries a lower weight at 8-10% of the exam. Since the AP® Human Geography exam is one of the more difficult AP® exams to pass, it would be helpful to know how many questions in each section you need to answer correctly in order to achieve a score of 3 or better. The AP® Human Geography score calculator from Albert reveals that you need to get 30 of the 60 multiple-choice questions right and be awarded a minimum of half of the possible points in the free-response section in order to pass the exam. Return to the Table of Contents Is AP® Human Geography worth it? The AP® Human Geography exam is absolutely worth taking for many students. In general, AP® courses are valuable to guide students toward building college-level skills in a high school setting. AP® Human Geography is especially valuable as it serves as many students' introduction to AP® courses. In addition to the study skills, AP® courses can be valuable because they show college admissions counselors that you take your academics seriously and that you don't shy away from academic rigor. According to College Board research, "students who receive a score of 3 or higher on AP® Exams typically experience greater academic success in college and have higher graduation rates than their non-AP® peers." One of the most useful things about taking AP® courses is the opportunity to gain college credit during high school. Going into college with pre-earned credits can translate into tuition savings and provide students the opportunity to either graduate early or explore additional courses outside their major. Below is a table that shows just a few colleges that accept AP® Human Geography for credit and the savings that are realized as a result. School Minimum Score Required Number of Credits Estimated Tuition Savings American University 4 3 \$4,761 Rutgers University 4 3 \$2,745 University of Maryland 4 3 \$4,161 University of Wisconsin - Madison 3 3 \$4,440 Ohio State University 3 3 \$3,735 MIT 5 9 \$7,470 UNC-Chapel Hill 3 3 \$3,810 Auburn University 4 3 \$3,609 As you can see, the chart shows that there are definitely savings to be had by earning college credit for AP® exams in high school. These savings, coupled with the educational benefits, show that taking AP® Human Geography is worth it. Check out Albert's AP® Human Geography practice questions When is the 2022 AP® Human Geography exam? The 2022 AP® Human Geography exam will be given in person using paper-and-pencil tests. The 2022 AP® Human Geography exam will take place on: Thursday, May 5, 2022 at 8am local time Curious about when other AP® exams are happening in 2022? View or download the complete AP® exam schedule here. Return to the Table of Contents When do AP® Human Geography scores typically come out? According to the latest update from the College Board exam season timeline, students will receive their AP® scores in July 2022. Historically, the College Board typically releases AP® scores early in the month of July. You'll be able to access your AP® scores online with your College Board account username and password Return to the Table of Contents How is AP® Human Geography scored? What's the weighting of different questions? The AP® Human Geography exam scoring follows this format: SectionQuestionsTime% of Exam Score1: Multiple Choice60 questions1 hour50%2: Free Response3 questions1 hour and 15 minutes50% The multiple-choice section of the AP® Human Geography exam includes a total of 60 questions that need to be answered within the one-hour time limit. As of the 2020 exam season, this section has been revised to require more analysis of both qualitative and quantitative sources. The multiple-choice section groups questions in 5-8 sets. Each set will include 2-3 questions that relate to either a text or data-based source. At least one of the sets of questions will include a paired set of sources. The free-response portion of the exam consists of three questions. You will have one hour and 15 minutes to complete your answers to these questions. In past years, the points for each of the three questions could vary. Starting in 2020, each question will be worth 7 points. The first free-response question will require you to describe and apply a geographic scenario. The second question on the free-response portion asks you to describe and apply geographic data. This data will be supplied and will be either qualitative or quantitative in nature. The third and final question is a repeat of the second question's format, but will use two supplied sources. These sources may be quantitative, qualitative, or both. Quick tip: When using examples, be sure to be specific. Past responses have received lower points due to the use of generic examples. The examples you use should demonstrate a solid understanding of the content and be specific to that scenario. The content weighting for the AP® Human Geography exam is outlined below: UnitsExam WeightingUnit 1: Thinking Geographically8-10%Unit 2: Population and Migration Patterns and Processes12-17%Unit 3: Cultural Patterns and Processes12-17%Unit 4: Political Patterns and Processes12-17%Unit 5: Agriculture and Rural Land-Use Patterns and Processes12-17%Unit 6: Cities and Urban Land-Use Patterns and Processes12-17%Unit 7: Industrial and Economic Development Patterns and Processes12-17% Check out Albert's AP® Human Geography practice questions What happens if you fail AP® Human Geography? Should you fail the AP® Human Geography exam, stay calm and understand that this is something you can easily fix. The AP® Human Geography exam is given once every year in May. You can take the exam as often as you like in order to pass or in an attempt to get a higher score. You'll just need to pay the exam fee each time you retake the exam. Your high school GPA will likely not be impacted at all if you fail the AP® Human Geography exam. Most schools don't use your AP® exam scores as part of your overall course grades. Grades are based on a combination of coursework and class tests, so as long as you've scored well on those, your GPA will be fine. If you fail the AP® Human Geography exam, you will not receive college credit for the course. Most colleges will not award college credit for any score lower than a 3 (some schools require a 4 for college credit). If college credit is your goal and you failed or scored lower than a 3, you will need to retake the exam. Some students are concerned with how failing the AP® Human Geography exam will reflect on their college admissions process. As the student, you are in control of where your AP® scores are sent, so you can decide who sees these scores. If you do end up sending a low or failing score to a college, you can often have that score replaced with a higher score when you retake the exam. Return to the Table of Contents When do students typically take AP® Human Geography? When is best? Many students take AP® Human Geography in their freshman or sophomore year. This exam is typically considered by students to be a good introductory AP® exam. While some schools allow freshmen to take this course, others require that students take at least one other AP® history course prior to taking AP® Human Geography. The decision of when to take AP® Human Geography also depends on the total number of AP® courses you want to take throughout your high school career. If your goal is to take a large number of AP® courses, you may want to consider taking AP® Human Geography earlier. If you only plan on taking a select few AP® courses, you can wait until later to take this course. The benefit of waiting to take the AP® Human Geography course is that you will be more acclimated to the demands of juggling several difficult classes at one time and that you will be better suited to the level of writing required in AP® courses. Taking other AP® exams prior to taking AP® Human Geography will also give you more experience with the AP® exam format and the level of detail required for the writing portion of these exams. You should consult your parents, teachers, and guidance counselor to decide the best time for you to take the AP® Human Geography exam. The decision should be based on factors that are unique to you and to your academic goals. Return to the Table of Contents Where can I find past AP® Human Geography exams? Past AP® Human Geography exams can be found on the College Board's AP® Central website. From that website, the College Board also provides links to practice tests for past exams. These practice tests allow you to become comfortable with the kinds of questions that have been included on past exams and to understand the types of answers that have achieved high scores in the past. Here are the most recent practice tests for the AP® Human Geography exam: The AP® Human Geography exam was redesigned for the 2019-2020 academic year based on a reorganization of the units covered. The practice questions above will still be useful, but will need to be weighed against the most recent changes. The practice tests above only cover the free-response portion of the AP® ®Human Geography exam. If you would like more practice on the multiple-choice section of the exam, the AP® Human Geography Course and Exam Description provides a limited number of examples. There are only 15 multiple choice questions in the guide, so this will not be a comprehensive reflection of the questions on the actual exam. It will, however, provide a useful peek into this portion of the exam. To get more practice on the multiple-choice portion of the AP® ®Human Geography exam, you can visit the Albert website to view hundreds of additional multiple-choice practice questions. These practice questions have been written to align with the units and learning objectives covered by the AP® Human Geography exam. You can find even more useful information for the AP® Human Geography exam on the AP® Central website. This information can be vital to achieving the highest score possible on the exam. Included on the AP® Central website are: The scoring guidelines provide information on how points are awarded for each short answer question. The short answer questions are much more subjective to grade than the multiple choice questions. Using the scoring guidelines will give you valuable insight into the kinds of answers that have been given full or partial credit in the past. The Chief Reader Report is published each year and allows you to gain in-depth insight into how the short answer and essay questions are graded. This report details what the exam graders are looking for in each question and the information that was present in highly successful responses. In addition, this report outlines where students' answers were found lacking. When reviewing the 2019 Chief Reader Report, you can see that on question 1 (in Set 2), many students misread the question. The Chief Reader also stated that students tended to give generic examples. Reading this report would help students to understand that they need to use specific examples and to completely read the question to ensure they understand it before answering. You can also find very useful information on the Scoring Report for the AP® Human Geography exam. The report will show you at a glance which questions were most often missed by past exam takers as well as which questions most students answered successfully. For example, question #3 on the 2019 exam (Set 1) had the lowest mean score of 1.70 points (out of a possible 6). To answer this question correctly, students need to define the term "devolution" and relate it to several different aspects of politics and life. The Chief Reader Report states that students who did not receive full points for this question did not have a clear understanding of the term devolution. They tended to define it as the opposite of evolution rather than the transfer of power from national to regional and local governments. Another useful tool not included above is the list of sample responses for the AP® Human Geography exam. For example, the sample response for question #1 (Set 1) provides sample responses for the question with a breakdown of the point awarded for topics covered. The set includes three sample responses, one that received full credit, one that received 5 out of 7 possible points, and one that scored 3 out of 7 possible points. If you're looking for powerful practice with AP® Human Geography FRQs, Albert has practice questions for each type of FRQ along with examples of responses that would earn full points. Albert even provides a detailed explanation of how the sample response earned each point in the rubric! While the short answer and essay questions do require more thought and planning, don't forget that 50% of the exam score comes from the multiple-choice section. Albert maintains thousands of multiple choice practice questions that coordinate with the AP® Human Geography units and standards. Along with the question and answer, Albert also includes a detailed explanation of each question to further your knowledge before taking this exam. To learn more about Albert, click here Who should take AP® Human Geography? What sort of students may like it more than others? Since AP® Human Geography is considered to be a relatively entry-level AP® course, many students choose to take it as the first AP® course of their high school careers. If you are interested in social science, this could be a good AP® course choice for you. There is more detail about the course in the course overview. Even though AP® Human Geography is considered to be a good starter AP® course, it is not required to be successful in later AP® courses. If the course content is not a fit for your skills and interests, you are better off choosing an AP® course that does appeal to your interests. If your goal is to eventually attend college, you'll want to take at least a few AP® courses to increase your chances at acceptance, especially for the more selective colleges. Taking AP® Human Geography can be useful in opening the door to other AP® courses throughout your high school career. However, if your goal is to achieve all 5s on your AP® exams, you'll need to work hard when studying for the AP® Human Geography exam. This exam awards a surprisingly low number of 5s, likely due to the fact that it is the first AP® exam for many students and they are unaware of how to best prepare for the exam. In 2019, only 10.8% of those who took the exam scored a 5. In 2019, AP® Human Geography was the second-hardest AP® test — or, more accurately, the test that awarded the second-lowest percentage of 5s. The lowest percentage was for the AP® World History exam. Only 8.6% of students scored a 5 on that exam. Achieving a perfect score on the AP® Human Geography exam is difficult, but not impossible. However, you should base your AP® ®course choices on your academic interest and strengths rather than simply choosing those with the highest chance of a perfect score. You are in control of which courses you choose to take. You should consult your parents and your guidance counselor for input and assistance with this important decision. Return to the Table of Contents How do students typically score on AP® Human Geography? What's the score distribution? Students typically score lower on this exam than on other AP® exams. Because the AP® Human Geography exam is one of the more difficult to pass, it is important to be well prepared for this exam. Your score will depend on your level of preparedness for the exam as well as your aptitude for the subject. Year % of 5s % of 4s % of 3s % of 2s % of 1s Pass Rate % 202114.4%19.7%18.3%15.1%32.4%52.5%202011.6%22.1%24.5%10.9%30.9%58.2%201910.8%18.2%20.1%16.7%34.1%49.1%201813.0%19.8%21.9%8%21.5%17.0%28.6%54.4%201710.7%17.3%21.0%17.1%33.9%48.9% As you can see, about half the students fail the AP® Human Geography exam each year. This higher failure rate is likely due to the fact that this is the very first AP® exam many students take. For the 2021 academic year, the mean score for the AP® Human Geography exam was 2.69, which is derived from a total of 211,735 test-takers. Return to the Table of Contents Need help preparing for your AP® Human Geography exam? Albert has hundreds of AP® Human Geography practice questions, including multiple-choice, free response, and full-length practice tests to try out.
